# Web Connection Demo Kit

Contents

Presentation Connexion au kit de démo The menu Check and prepare the configuration Selecting the integration mode Generate a payment page Generate a page with the Widget API Error management Redirect payment web page

## Presentation

The Payline Kit is for merchants, so they can easily test the features offered. It includes a web interface to call webservices API Payline. A test merchant and his VAD contracts must be created before using this demo kit.

With each payment, it is possible to select the contract on which the transactions will be authorized and delivered. In web mode, and once the context parameters are defined, you will be redirected to a payment page allowing you to enter the information on the card:

- Card Number
- Expiration date
- Visual cryptogram

### Connexion au kit de démo

The web link: : http://concupourvendre.com/kitphp/login.php

You must then authenticate:

- Login: your email address
- · Password: sent to the corresponding address.

Login	× +												
🗲 🛈 🔏   demo.payline.com/	~kitphp/login.php		G	Reche	ercher				#	÷	۲	٩	≡
		Mot de	Logi e-mail : u e passe : • Connexio	in utilisateur@ecor	mmercant.com	Moto	le passe	perdu					
		P	ayl	ine vendre									

Then you must add your merchant or select it. You must collect the following information about the Payline Administration Center: https://homologation -admin.payline.com/

## The menu

Once connected, the homepage offers the following menu:

- Home : allows pre-configured payment fields and lists transactions;
  Web : allows you to perform the authorization and retrieve the result with a redirected web page;
- Direct : allows to realize some web services of the Payline API live;
- Wallet : allows to realize the web services associated with wallets;
  Extended : allows the realization of the web services associated with the results of the operations;
- Ajax API : allows to realize the web services associated with Ajax API mode.
