

Codes - colorDepth

This table shows the values for the "colorDepth" field of the browser object.

The Action describes the type of operation that will be performed.

Code	Type
1	1 bit
4	4 bits
8	8 bits
15	15 bits
16	16 bits
24	24 bits
32	32 bits
48	48 bits

Some browsers like Chrome may return the value '30' which is not valid.

If Monext Online receives '30' as colorDepth's value it transforms it into '24'
